PROFILE

I am a passionate front-end developer with a love for creating beautiful and interactive websites. I have a strong foundation in JavaScript, HTML, and CSS, allowing me to bring designs to life and provide engaging user experiences. Additionally, my knowledge of SQL enables me to work with databases effectively. I also have experience with Python and basic familiarity with C# and C++.

Projects :

- Personal portfolio: This is my website. I made this website with HTML, CSS, and JAVASCRIPT.
- Vacuum cleaner with Python: I made Vacuum clean with Python code. First, I create an environment for clean and dirt areas. Users can choose the auto or manual option for clean dirt areas.

Map For City Distance:

- I made this project with Python for my University coursework. First, I create a map and I use three algorithms for finding the shortest road. I use speech Recognition for this code.
- Website For countries: I made this project with Html, CSS, SQL, JAVASCRIPT, and DOCKERFILE. From this project, users can find out about regions, the country's populations, the country's city, and capital city.
